ON TUESDAYS WE WANDERLUST...

Today we looked at Hedgehogs, introducing the word hibernation with a story called 'Wide Awake Hedgehog'. Here is a YouTube link to the story: [https://m.youtube.com/watch?v=LK2\\_YnyU-x4](https://m.youtube.com/watch?v=LK2_YnyU-x4)

We also found out some interesting facts about hedgehogs. Did you know that their numbers are depleting to under 1 million just in the UK? That they have 7000 spines? Did you know that they live till they are about 2-5 years old, and most importantly they eat slugs and snails, worms and beetles too! We also were introduced to the word 'nocturnal' and I wonder if the children can remember what this means?

Take a look at the children's challenges today, create somewhere for a hedgehog to stay for the winter or to create their very own hedgehog!
