Computing – Years 1-6

Summary of Unit	Key Outcomes/Skills
Children will find out about which information should be kept private and learn about permissions. They will also learn how they can protect themselves online, including creating passwords and reporting online abuse to the appropriate person.	The main outcome of the iSafe sequence of learning is to teach children how to stay safe online. Children will learn about cyber bullying, manipulation, cyber footprints, permissions, PEGI, passwords, reporting abuse and much more. Children are living in an ever-growing world of technology and we strive to keep them knowledgeable about how to keep safe. We ensure that children know they can talk to a trusted adult in school to report any issues they may have had online.
